

backend/api/models.py Documentation (Roman Urdu)

Yeh file application ke "Model Downloader aur Manager" ka interface ha jaha se user local machine p AI models delete ya download (pull) krta hb.

File Ka Maqsad (Purpose)

Isma Ollama AI k models ko web UI control karwaane walay REST APIs shamil hn (Models ki list lna, naya Llama-3 model lagana aur progress bar update krnz).

Code Blocks aur API Endpoints ki Tafseel

1. GET /models aur DELETE /models/{model_name}

- **Kya karta hai?:** PC py mojood sab download models frontend me show karwata ha (e.g. gemma:2b, mistral:7b) aur unhein udany / trash krmy k liy delete API call lgata hy.

2. POST /models/pull

- **Kya karta hai?:** Jab user kisi model k agly "Download" py dabta ha. Ye endpoint Server-Sent Events (SSE) ki streaming chalu karti hai, jis sey UI par real-time GBs mb MBs "progress bar" chalnay lagtaz hb k kitna download hogya aur baki hy.

3. GET /models/{model_name}/info

- **Kya karta hai?:** Model ki technical tafseel batta hb e.g. kitni Context Memory leny ki taqat hai.
