

`backend/api/openai_compat.py` Documentation (Roman Urdu)

Yeh AI project ki "Fake OpenAI Banne Wali Takneek" (Compatibility Layer) hai!

File Ka Maqsad (Purpose)

Bohot saarey 3rd Party tools aur VS Code extensions (jesy Cursor, Cline, AutoGPT) serf OpenAI (ChatGPT) ky paid (paisy wale) API key format p kam krtay hai. Yeh script SoloLLM ko un system k liye bilkul OpenAI jaisa dikhata hai. Yani app in tools ma Local URL (`http://localhost.../v1`) dalogy aur wo samjhein gay aap OpenAI server use kar rhay ho, lekin asal me Local Model chal raah hga FREE mb!

Code Blocks aur Classes ki Tafseel

1. `class ChatCompletionRequest / Response`

- **Models:** Yeh parameters ka shape design bilkul OpenAI ki API Docs kay mutabiq standard bnata hb jesy `choices`, `finish_reason`, `usage` taky dusrey client tools ko code structure easily parse krny aye.

2. `POST /v1/chat/completions` (Ahem function)

- **Kya karta hai?:** Bahar wali extension is endpoint standard m Sawal (Messages) bhejti hai. Ye endpoint unhen uthaata hb, phely Ollama ki Local format me tabdeel krta hy, Ollama main pass kartha ha. Jbb waha s jawab aata ha tu answer wapis Fake OpenAI Response shape me lapet kar Extension ko pakiar deta ab!

3. Streaming Response (`_stream_response`)

- **Kya karta hai?:** Agar extension ne live character by character maanga hh (Stream=True), toh yeh `ChatCompletionChunk` SSE payload istamal kartu hy jo ChatGPT jesa live UI dikhney mein bilkul mutassib mdd dn.
