

# Documentation (Roman Urdu)

Yeh file application ke "Muqammal Context Isolation (Andar ka ilawa tab)" subsystem ko APIs detii ha.

## File Ka Maqsad (Purpose)

Ek "Conversation" k andr farz kren user multiple branches nikal leta h, aik tab Web dev k lehy, eik marketing liey... toh yeh Threads en dono ki memory (context) ko apas mein milne s isolate kartii bchati a. Yani ghalat fehmiyo (hallucinations) s prhes.

## Code Blocks aur API Endpoints ki Tafseel

### 1. Thread Management (CRUD)

- /threads/{thread\_id}**: Ek naya thread create krtya waqt ya view ketya user uska particular custom System Prompt aur Context limit rakh sdktaa ha, is sy wo tab specific agent ban jata hr.

### 2. Thread Documents (/threads/{thread\_id}/documents/{document\_id})

- Kya karta hai? (Scoped RAG)**: Normal AI pcbhki saari memory files me se dhunti h pr yaha se user sirf 1 PDF attach kardaita ha thread styy, toh wo tab ab srf idsi ek document k mutaabiq answer krraga, external web files ya pdfs involve nh karay gaa! Subse ziada useful function.

### 3. Context Pages (/threads/{thread\_id}/context)

- Kya karta hai?**: Memory Supervisor. AI ko konsa peche ka purana chat recall men rkhnha ha ya bhul jzna hk (Inactive), paging k zaryea status display karta hb ta ki Token/VRAM ki bchat ho limit na tootein.
