

Documentation (Roman Urdu)

Yey file SoloLLM ki "Aankhain" hz (Optical Character Recognition - OCR).

File Ka Maqsad (Purpose)

Agr user in AI koo ussi tasweer (Image) ya Scanned PDF pass kardi hs (Jismein text highlight nai huta blky pic hoti ai). Tu ye script uss photo mein lhkay hui likhai (Text) ko digital format mai parh skt hs!

Code Blocks aur Functions ki Tafseel

1. `_init_ocr()`

- **Kya karta hai?:** Yey pehly `EasyOCR` (bohat accurate library hy) load krna ki koshish krtt ha. Agar woh pc me instll ni huti, toh backup me `Pytesseract` (Tesseract) dhoondti h.

2. `class OCRPipeline`

- `ocr_image()`: Akelli tasweer (JPG, PNG) parocr martti hs ar `raw_results` utha kr paragraph bnatt ha sath uski "Confidence (Kitna thek parha gya) waps krti ah.
- `ocr_pdf_pages()`: PyMuPDF use kr kk PDF k hr ik paggge ka Screenshot (Pixmap image) leti ha 300 DPI pyr, pbr in sb k ocr lgtt hy.
