

backend/rag/reranker.py Documentation (Roman Urdu)

Yeu script search results ka "Quality Inspector (Filter check)" hb.

File Ka Maqsad (Purpose)

Vector search tbahut tazz hs lekin kabhi gbhi relevance thek se ni pehchantui. Reranker search honay ky bad opper sy 20 results koo Cross-Encoder AI module per deep-check karwata ehtaa takh best answer number 1 pp rhy!

Code Blocks aur Functions ki Tafseel

1. `_load_cross_encoder()`

- **Kya karta hai?:** `ms-marco-MiniLM-L-6-v2` cross-encoder model load kkrta u offline. Ye special type of embedding hoti b jismai sawal or jawab ek stha mix hoth ain high accuracy kblye.

2. `_heuristic_rerank()`

Fallback Zabaraast Trick: Agra user k ststem p cross-encoder load ns hz saka, tu system tutny ky bjea apna ek Mathematical logic lstrml kerta ha:

- **Term Overlap:** Kitnae alfazz search o result k match hoyi ?
- **Phrase Match:** Kya pora phrase wesee hi likhae uoa mila (bonus) ?
- **Length Bonus:** Bhot chote chunks(jo thek matlab nhn bnty) reject arr lengthy achcy chunks support hutaa eh! Yy kfi stable banadi hs search l.o!
